

The MBA programme is designed to equip students with the managerial, analytical, and decision-making skills needed in today's business environment

AUM aims to educate its students to become well-rounded leaders and entrepreneurs. The university seeks to equip students with a solid intellectual and academic foundation supported by career-specific skills, professional behaviour and ethical values. AUM has a holistic learner-centred approach and students are taught by faculty from leading international universities. AUM employs innovative teaching methodologies, and creates a stimulating environment for academic research and publication. AUM's affiliation with Purdue University in the US includes areas related to curriculum development, academic and administrative systems, quality assurance, observance of accreditation standards, and other related areas. The AUM Masters in Business Administration (MBA) programme is designed to sharpen the managerial, analytical, and decision-making skills needed

in today's global environment. The MBA programme is stimulating, intense, and develops highly effective business management professionals. The in-class experience includes mirroring of real business management decision-making scenarios, extensive interaction between the faculty and the students, personal communication and presentation skills enhancement, and team-based exercises. The College of Engineering & Technology offers bachelor degree programmes such as Industrial Engineering, Electrical Engineering, Mechanical Engineering, Telecommunications and Networking Technology, Computer Engineering, and Information Systems and Technology. The College of Business offers bachelor degree programmes in Accounting and Business Administration, including Management Information Systems, Finance, Marketing and Human Resource Management.
